Feedback

What do you think about our Provider Newsletter? Do you have any feedback you would like to share with us? We are always working to make the content and format **easy to understand, helpful** to you and your staff, and **applicable** to your day-to-day work. If you have any comments, suggestions or ideas for future articles you would like to see, please share with your Provider Engagement Representative or email us at ProviderRelationsInquiries@CommunityHealthChoice.org.

Community Health Choice is excited to announce our upcoming move in March 2024 to our new offices, located at 4888 Loop Central Dr., Houston, TX 77081.

Community Health Choice launched a new provider portal in 2022. Our portal offers a wide range of functions including:

- New self-service capabilities, including the ability to manage/maintain users, as well as granting access, adjusting access, and removing access
- · Reference numbers for eligibility verifications and any questions asked via the portal
- Log history for claims manager—claim submissions, status of claims submitted, authorization history, training and attestation, therapy waitlist history, and member eligibility search history

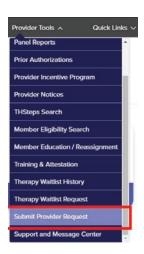

If you or your staff has questions or would like a personalized training regarding the portal please reach out to your Provider Relations Representative or send an email to providerrelationsinguiries@communityhealthchoice.org.

NEW ENHANCEMENT EFFECTIVE FEBURARY 2024

ProgenyHealth® Maternity Care Management Program

We are excited to introduce the ProgenyHealth® Maternity Care Management program – an innovative program designed to support your patients and ease your workload. The program is delivered by Community Health Choice for their members. The Maternity Care Management program supports patients before, during and after their pregnancy with the support of experienced Maternity Case Managers... at no additional cost to you or your patients.

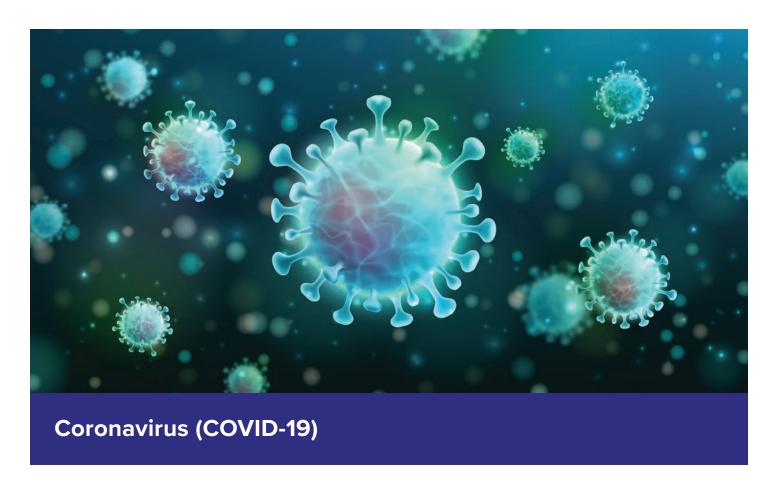

The program includes:

- Case Management Member support from a maternity case manager in collaboration with OB/GYNs via personalized care plans from pregnancy through the first eight months postpartum.
- **Mobile App** Reproductive health support from cycle tracking and conception to pregnancy and parenthood through the app.
- **Return to Work** Help women transition back to the workplace if they choose, as well as navigate job issues, childcare, and more.
- Intelligent Platform A comprehensive medical record that drives all interventions and care pathways based on evidence-based protocols and maternal risk factors.

To refer a patient, click <u>here</u>. Learn more about the program <u>here</u> and download an easy-to-understand overview of the program for your patients. The patient flyer also includes simple instructions for downloading a mobile app.

To learn more about ProgenyHealth's programs and services or if you'd prefer to enroll your patient by phone, please call **1-855-231-4730** Monday-Friday between 8:30 AM and 5:00 PM ET.

Thank you for your partnership in caring for Community Health Choice Members.

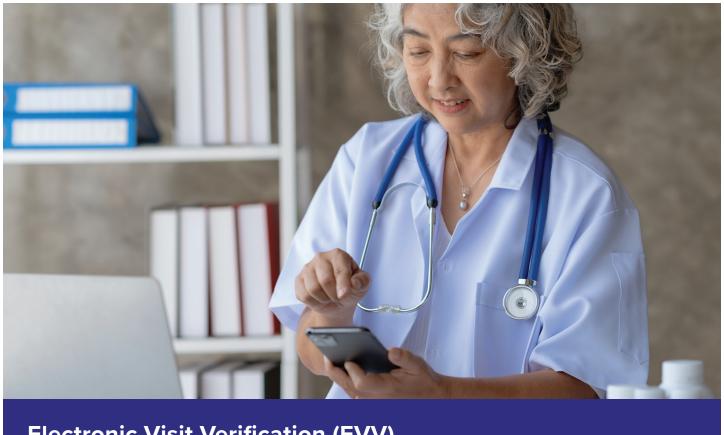

Community continues to monitor the coronavirus disease (COVID-19) and the most updated information from the Centers for Disease Control and Prevention (CDC), Texas Department of State Health Services, and the Harris County Public Health Department.

Please visit our website where you will find a page dedicated to COVID-19 with the most current information, updates, and resources: https://provider.communityhealthchoice.org/coronavirus/.

Provider Contact Center

Don't have time to contact us by phone? Not to worry. If you have claim and authorization questions that are not access to care, it is best to email us at ProviderWebInquiries@CommunityHealthChoice.org.

Electronic Visit Verification (EVV)

Home Health Care Services (HHCS) EVV Claims

Effective January 1, 2024, Electronic Visit Verification (EVV) is required for Medicaid home health care services.

Reminder: The claims submission cutover date was December 1, 2023, this is the date the MCO must reject HHCS EVV claims that come directly to the MCO.

Providers and FMSAs must submit all HHCS EVV claims starting with dates of service on or after Dec. 1, 2023 to TMHP using TexMedConnect, or through Electronic Data Interchange (EDI) using a Compass 21 (C21) Submitter ID.

MCOs must reject any HHCS claims with EVV services back to the submitter directing them to submit the claim to TMHP for EVV claims matching.

Please visit our EVV Provider Webpage for Important Information: https://provider.communityhealthchoice.org/electronic-visit-verification/

Important Reminders

1. Please be sure to submit your claims to the appropriate payer ID/claims address:

HHSC

Electronic Payer ID: 48145 Claims Mailing Address:

> Community Health Choice PO Box 981840 El Paso, TX 79998-1840

Marketplace

Electronic Payer ID: 60495 Claims Mailing Address:

> Community Health Choice PO Box 981839 El Paso, TX 79998-1839

2. Please be sure to submit your claims payment reconsiderations accordingly:

HHSC

Requests for reconsideration must be made within 120 days from the date of the Explanation of Payment (EOP). Please use the form at communityhealthchoice.org Provider > Forms and Guides > Provider Payment Dispute Form. Include copy of Community Health Choice EOP along with all supporting documentation, e.g., office notes, authorization, and practice management print screens.

Mail to: Community Health Choice
Attn: Claims Payment Reconsideration
4888 Loop Central, Suite 600
Houston, TX 77081

Email: ProviderWebInquiries@CommunityHealthChoice.org

Marketplace

Requests for reconsideration must be made within 180 days from the date of the Explanation of Payment (EOP). Please use the form at communityhealthchoice.org Provider > Forms and Guides > Provider Payment Dispute Form. Include copy of Community Health Choice EOP along with all supporting documentation, e.g., office notes, authorization, and practice management print screens.

Mail to: Community Health Choice
Attn: Claims Payment Reconsideration
4888 Loop Central, Suite 600
Houston, TX 77081

Email: ProviderWebInquiries@CommunityHealthChoice.org

3. Please be sure to utilize frequency code 7 for corrected claims accordingly:

Do not submit a frequency code 7 claim when the date of service is 120 days (Medicaid) or 180 days (Marketplace) longer than the date of disposition on the original claim. Doing so may cause the whole claim to be reversed and denied for lack of timely filing.

4. Sterilization Form

Please reference Section 2.2.8.1 in the <u>TMHP Manual</u> for the new form required to be submitted effective 9/1/2021.

5. IFSP/ECI Service

The IFSP form is no longer required. Please do not send these forms with claims or via fax. We no longer require these forms in order to process claims for payment.

Important Reminders

6. Medical Necessity (Appeals)

IF authorization was denied due to medical necessity, do not send a claim with the medical necessity appeal and make sure you are using the appropriate form.

Provider **APPEAL** form to be sent to Medical Appeals Team (do not attach a copy of claim):

https://provider.communityhealthchoice.org/wp-content/uploads/sites/2/2020/10/Provider-Appeal-Form-Revised-09-30-2020.pdf

7. Payment Reconsideration

Do not attach a copy of the HCFA/UB. Doing so may cause your request to be denied as a duplicate. Attach the appropriate form with correspondence or documentation.

Provider **PAYMENT** dispute form to be sent to Claims (do not attach a copy of claim):

https://provider.communityhealthchoice.org/wp-content/uploads/sites/2/2022/05/Provider-Payment-Dispute-Form.pdf

8. Exclusive to Behavioral Health

HCPCS codes billed by LMHA and CDTF Providers pay to the group NPI only. Do not add a rendering Provider.

CPT codes billed by LMHA and CDTF Providers should have a rendering and the group NPI submitted on the claim.

Adding or omitting the incorrect NPI based on service rendered may cause a delay in payment or cause a claim to be denied in error.

9. CPW Reimbursement Guidelines

Case management for children and pregnant women services are limited to one contact per day per person. Additional Provider contacts on the same day are denied as part of another service rendered on the same day.

Note: the authorization requested for the service must match what is billed.

Procedure code **G9012** is to be used for all case management for children and pregnant women services. Modifiers are used to identify which service component is provided.

Please visit section **3.3 Services, Benefits, Limitations, and Prior Authorization** in the TMHP manual for additional details.

10. Claims with Handwriting

Claims with handwriting are not acceptable and will be rejected by the Clearinghouse (Change Healthcare).

11. Electronic Claim Submission with Primary Insurance Payments

When a Provider submits primary insurance payments electronically, we attempt to confirm the primary information. At times this cannot be confirmed due to insufficient information, Member termed on date of service, newborns not auto enrolled, etc.

A Provider should only be submitting electronic claims with primary COB information when they have received a copy of the EOP from the primary carrier.

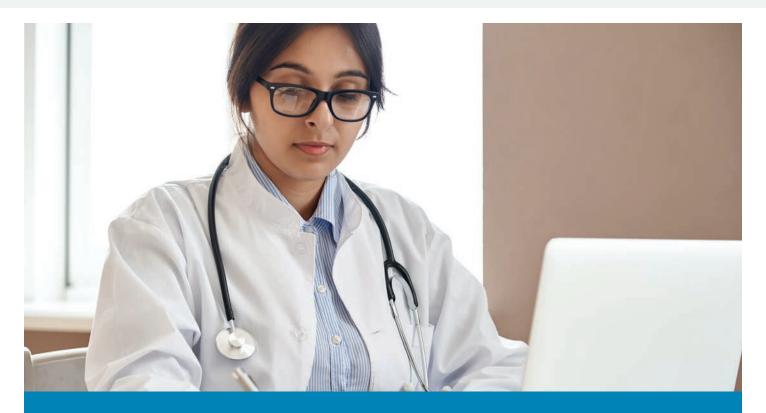

Submitting a claim with the guesstimate of what the primary carrier will allow/pay is not acceptable. Claim will deny requesting a copy of the Explanation of Payment.

Don't Let This Happen to You: Top Billing Errors

Community aims to adjudicate clean claims timely and accurately. The following are the top reasons that cause denials or delays in payment.

Who	What	Causes of denials or delays	Do
All Providers	Electronic Claim Submission	Billed with the incorrect payer number and Member number	Bill with the appropriate payer number and Member number
	Taxonomy	The taxonomy code and NPI number for both the rendering and the billing Provider are not present on the claim.	Include the taxonomy code and NPI number for both the rendering and the billing Provider appropriately.
	Services/Billing Codes in Participating Agreement	 Authorization request includes services or billing codes NOT included in the Participating Agreement Billing codes not included in the Participating Agreement Billing codes not accepted or payable with Medicaid (i.e., G0410) 	Request authorization and bill for the services and/or billing codes as specified in Participating Agreement with Community.
	Rendering Provider	 Claim does not include rendering Provider's NPI Billing NPI is not the Group NPI Provider is not enrolled in the Medicaid program 	Include the rendering Provider's NPI.
	Frequency Code 7: Indicates the new claim is a replacement or corrected claim; the information present on this bill represents a complete replacement of the previously issued bill	 Resubmitting the same claim multiple times Submitting corrected claims changing the Member Submitting corrected claims changing the Provider Submitting corrected claims changing the date of service 	 Allow 30 days between submissions. Include original claim number in box 64 of UB04 or box 22 of the CMS1500 form.
	Modifier 25	 Using a 25 modifier when billing for services performed during a postoperative period if related to the previous surgery Using a modifier 25 on any E/M on the day a "major" (90-day global) procedure is being performed Adding modifier 25 to an E/M service when a minimal procedure is performed on the same day 	 Add modifier 25 to an E/M service when level of service can be supported as significant, separately identifiable. All procedures have "inherent" E/M service included.
	Unlisted Procedures	 A more appropriate procedure or service code is available No supporting documentation Appropriate modifier missing for unlisted DME, orthotics or prosthetics 	 Include the most current and appropriate procedure or service code available. Include supporting documentation when unlisted procedure or service code is inevitable. Include appropriate modifier.

Provider Type	Program	Description	Reminders
ECI Providers	IFSP forms	Submitting IFSP forms to Community	Do not submit IFSP forms to Community
	Rendering NPI	Including a rendering NPI may hold up claim payment or have claim payment denied.	Do not include rendering NPI since it is not required
	Billed Group vs Rendering Provider	Submitting claims with Rendering Provider	Bill with Group vs Rendering Provider
	Incorrect Place of Service (POS)	Submitting claims with POS 11	Bill with POS 50
	T1015	Not reporting the correct FQHC's PPS rate	Include FQHC's PPS rate
FQHCs and RHCs	Second and subsequent lines of each claim	Not including all services delivered during patient visit at normal charges	Include ALL services delivered during patient visit at normal charges
	Rendering Provider	Rendering Provider is no longer required to be submitted	Submitting a claim with rendering Provider information may cause a delay in payment. Please submit only the billing/group information for claims associated with FQHC and RHC services.
PT/ST/OT Providers	Modifiers	 Submitting claims without the proper modifier or no modifier at all. Modifiers GP, GO, and GN are required on all claims except when billing evaluation and reevaluation procedure codes. The AT modifier must be included on claims for acute therapy services. 	 Include the appropriate modifier. To avoid delayed payments, please ensure the appropriate units on claims submissions and untimed units should be billed as one unit.
Skilled Nursing Facility	Revenue Codes	Not billing with appropriate codes	Bill appropriate (subacute) level of care revenue codes

Prior Authorization Reminders

Providers should submit prior authorization requests:

- 1. At least 5 days prior to an elective admission as an inpatient in a hospital, extended care or rehabilitation facility or hospice facility
- 2. At least 30 days prior to the initial evaluation for organ transplant services
- 3. Within 24 hours of any inpatient admission, including emergent inpatient admissions
- 4. At least 5 days prior to the scheduled start of home health services, except those enrollees needing home health services after hospital discharge

Prior Authorization Catalog

Community has a Prior Authorization Catalog. This list contains prior authorization requirements for participating care Providers. Please visit our website at https://provider.communityhealthchoice.org/resources/prior-authorization-information for additional information.

Note: the Prior Authorization Catalog is subject to change.

Human Immunodeficiency Virus (HIV) and Sexually Transmitted Diseases (STDs)

Community Health Choice requires that Providers report all confirmed cases of STDs, including HIV, to the local or regional health authority according to 25 Tex. Admin. Code §§ 97.131 - 97.134 using the required forms and procedures for reporting STDs.

Providers must coordinate with the HHSC regional health authority to ensure that Members with confirmed cases of syphilis, chancroid, gonorrhea, chlamydia, and HIV receive risk reduction and partner elicitation/notification counseling.

Providers must have procedures in place to protect the confidentiality of Members who have received HIV/STD services. These procedures must include, but are not limited to, the manner in which medical records are to be safeguarded, how employees are to protect medical information, and under what conditions information can be shared.

Providers who provide HIV/STD services must comply with all state laws relating to communicable disease reporting requirements.

Visit the CDC website at https://www.cdc.gov/std/hiv/ for information related to treatment and screening of HIV/AIDS and STDs.

Additional Resource:

Visit the Agency for Healthcare Research and Quality for additional information at https://www.ahrq.gov/gam/index.html.

Perinatal Transmission of HIV

The Perinatal HIV hotline for immediate advice on HIV management in pregnant women and their infants, including referral to care may be reached as follows:

Perinatal HIV Hotline

https://nccc.ucsf.edu

888.448.8765

24 hours, seven days a week

In July 2023, The Houston Health Department (HHD) declared a syphilis outbreak in Houston and Harris County after seeing a 128% increase in cases among women and a nine-fold rise in congenital syphilis (CS).

- Statistics from the department indicate new infections rose from 1,845 in 2019 to 2,905 in 2022, a 57 percent increase.
- Cases among women totaled 674 cases in 2022, up from 295 cases in 2019. Congenital syphilis soared from 16 cases in 2016 to 151 cases in 2021.

Texas is leading the nation in the number of congenital syphilis cases. The 2021 CDC's sexually transmitted infections (STIs) surveillance report published that Texas had the most congenital syphilis cases in the United States with 685 cases. Unfortunately, Texas surpassed that with 955 cases of congenital syphilis according to the 2022 report.

The Houston Health Department (HHD) recommends syphilis testing to:

- Pregnant women at their initial prenatal visit, third trimester and delivery (required by state law)
- People who have had unprotected sex.
- Men with anonymous sex partners
- People with multiple sex partners
- People recently diagnosed with any other sexually transmitted disease such as gonorrhea, Chlamydia or HIV.

What can you do to help combat this outbreak?

- 1. Make sexual health a priority at every health visit.
- 2. Ask women AND men about their sexual practices.

- 3. Provide education including safe sex practices. If you talk about it, patients will.
- 4. Screen, test and treat annually (more often if indicated) anyone who is sexually active.
 - a. Check results of testing
- 5. If you provide care to pregnant people, syphilis testing should occur 3 times during pregnancy.
 - a. Initial prenatal visit
 - b. Third trimester (between 28 and 32 weeks)
 - c. At delivery
- 6. Report syphilis infections so sexual contacts can be located, tested, and treated.
 - a. HHD's Healthcare Provider Reporting:

*Provider eFax: 832-395-9683

*Provider phone: 855-264-8463

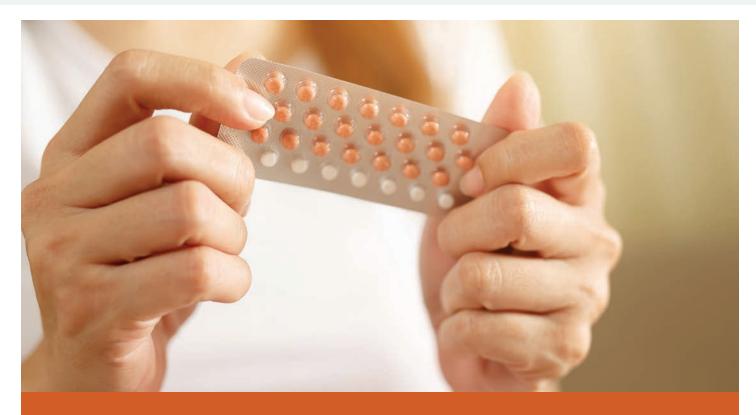

Information on testing sites and syphilis is available by visiting HHD's website.

Year Long Prescription For Contraception

HB 916 requires health insurers to allow a three-month supply at once to a person who is prescribed a new, covered contraceptive drug and then a 12-month supply at once thereafter.

As of January 1, 2024, health insurers* including Medicaid that cover prescription contraceptive drugs are required to provide a year's supply of the medication at once. This does not apply to the Children's Health Insurance Plan (CHIP).**

What does this mean?

Many women struggle to maintain consistent contraceptive use with a monthly or a 3-month supply of birth control which may lead to an unplanned pregnancy. This bill allows women to obtain birth control for up to a 12-month supply at one time.

How does it work?

A health benefit plan that provides benefits for a prescription contraceptive drug must provide for an enrollee to obtain up to:

 A three-month supply of a covered prescription contraceptive drug at one time the first time the drug is obtained. Clinically administered contraceptives are not applicable. AND A 12-month supply of the covered prescription contraceptive drug at one time each subsequent time the enrollee obtains the same drug. regardless of whether the enrollee was enrolled in the health benefit plan the first time the enrollee obtained the drug.

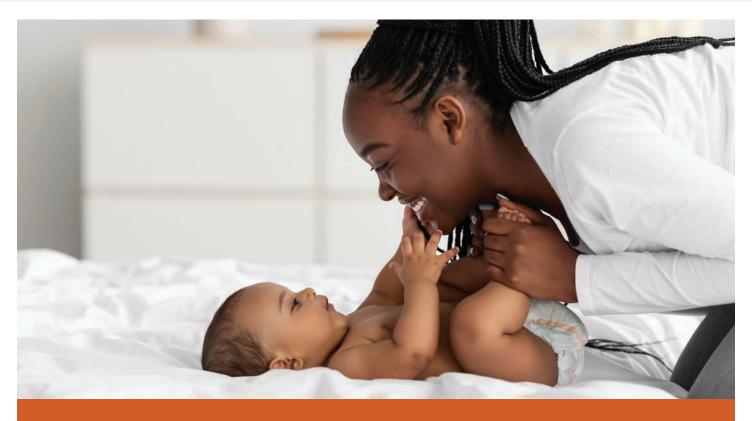

An enrollee may obtain only one 12-month supply of a covered prescription contraceptive drug during each 12-month period. Pharmacists can only dispense a 12-month supply per calendar year.

*Applicable to: Health insurers include TDI-regulated commercial plans, exchange plans, HMOs, school districts, Medicaid

**Not applicable to: Children's Health Insurance Plan (CHIP), self-funded ERISA plans, self-funded municipal plans (except school districts)

Texas House Bill 916 passed in the 88th legislative session. Effective September 1, 2023. https://legiscan.com/TX/text/HB916/id/2814458/Texas-2023-HB916-Enrolled.html

12 Month Extension Of Postpartum Coverage

"Out of the state's profound respect for the lives of mothers and unborn children, Medicaid coverage is extended for mothers whose pregnancies end in the delivery of the child or end in the natural loss of the child." (Wording of the bill)

Effective March 1, 2024, postpartum Medicaid STAR and CHIP (Children's Health Insurance Program) coverage is extended from the current two (2) months to:

- 6 months after a pregnancy loss (following the date the woman delivers or experiences an involuntary miscarriage)
- 12 months after a live birth

This extended postpartum coverage does not apply to CHIP Perinatal (CHIP-P) recipients. CHIP-P will continue to receive CHIP-P coverage through the end of the month when their pregnancy ends plus two postpartum visits.

Why is having 12 months of postpartum Medicaid coverage important?

- Half of the people giving birth in Texas get their health care coverage through Medicaid.
- Women with chronic health conditions have a 43 percent increased likelihood of preterm birth compared to women with none.

- 30% of pregnancy-related deaths occur from 43 days to 1 year after delivery according to the CDC.
- There is an increased risk of adverse outcomes due to the lack of access to reproductive and sexual health services.

What does this mean?

As patients transition to the postpartum period, their medical needs will change. Medicaid and CHIP recipients will now have access to covered services and providers that meet these changing needs throughout the extended postpartum period.

Covered services during the 12-month postpartum period include but is not limited to:

- Preventive or routine care to receive physicals, vaccinations, and sick visits.
- Continued care from an OB/GYN for gynecological care or contraception

- Continued treatment of physical health complications from the pregnancy and/or delivery
- Possible continued or emergent behavioral health treatment, including for substance use and mental health conditions.
- · Prescription drugs and vaccines
- Hospital care and services
- X-rays and lab tests
- · Vision and hearing care
- · Access to medical specialists and mental health care
- Treatment of special health needs and preexisting conditions

How does the recipient get coverage extended?

- Medicaid and CHIP recipients DO NOT need to apply to have their coverage extended.
- Coverage will be automatically reinstated for the remainder of the 12-month postpartum period for women who are not current Medicaid or CHIP recipients but who were enrolled in Medicaid or CHIP in Texas while pregnant and are still within their 12-month postpartum period (provided they are still residents of Texas).
- Women who are enrolled in Healthy Texas Women who are still within their 12-month postpartum period will be transitioned back to full-coverage Medicaid or CHIP for the remainder of their 12-month postpartum period.
- The Medicaid or CHIP recipients will get a notice by mail or through their "Your Texas Benefits" account (if they chose to receive notices electronically).

Exceptions to eligibility

Eligible Medicaid and CHIP recipients will receive the extended coverage through their postpartum period unless they:

- · Voluntarily withdraw.
- · Move out of Texas.
- Are determined ineligible because of fraud, abuse or perjury.
- Die

For more information

- Call 2-1-1 and choose Option 2.
- Visit the HHS Medicaid for Pregnant Women and CHIP Perinatal webpage.
- See attached frequently asked questions (FAQs)

Postpartum Medicaid and CHIP Coverage Extension FAQs

The Texas Health and Human Services Commission (HHSC) extended its postpartum Medicaid coverage from two to 12 months for eligible women, effective March 1, 2024.

HHSC is also providing 12 months of postpartum CHIP (Children's Health Insurance Program) coverage. The 12 months of postpartum coverage begins the month after a pregnancy has ended.

Q: Who is eligible for the 12-month postpartum coverage?

A: Effective March 1, 2024, eligible recipients include:

- Medicaid or CHIP recipients who are pregnant or become pregnant and women who enroll because they become pregnant.
 - CHIP Perinatal (CHIP-P) recipients are not eligible for 12 months of postpartum coverage. They'll continue to receive CHIP-P coverage through the end of the month when their pregnancy ends plus two postpartum visits.
- Medicaid or CHIP recipients who were enrolled in Medicaid or CHIP while pregnant or are no longer pregnant but are still within their 12-month postpartum period.
 - Women who transitioned from Medicaid or CHIP to Healthy Texas Women (HTW) after their pregnancy ended and who are within their 12-month postpartum period will be reinstated to full coverage Medicaid or CHIP.
- Women who received services while pregnant in Texas that would have been covered by Medicaid but who apply for Medicaid after their pregnancy ends. Medicaid applicants with unpaid medical bills can apply for coverage for up to three months before their application month. This doesn't apply to CHIP applicants.

Q: I'm not a current recipient, but I'm within my 12-month postpartum period. Does my coverage start from the date my benefits were terminated until the end of my 12-month postpartum period?

A: Your Medicaid or CHIP coverage will be reinstated beginning on March 1, 2024, until the end of your 12-month postpartum period.

Q: Do I have to apply for postpartum coverage?

A: No, you don't need to apply to have your coverage extended. Coverage will be extended for current Medicaid and CHIP recipients.

Coverage will be reinstated for women who are not current Medicaid or CHIP recipients but who were enrolled in Medicaid or CHIP in Texas while pregnant and are still within their 12-month postpartum period (if they are still residents of Texas).

Women who transitioned from Medicaid or CHIP to HTW after their pregnancy ended and who are within their 12-month postpartum period will be reinstated to full coverage Medicaid or CHIP.

Only women who are not currently enrolled in Medicaid or CHIP and were not enrolled in Medicaid coverage during their pregnancy need to apply to receive this benefit. Medicaid recipients with unpaid medical bills can apply for coverage for up to three months prior to their application month. This doesn't apply to CHIP recipients.

Q: What kind of coverage is included in the 12-month postpartum period?

- A: Medicaid or CHIP covered services remain available in the 12-month postpartum period. This is including but not limited to:
 - Regular medical checkups.
 - Prescription drugs and vaccines.
 - Hospital care and services.
 - X-rays and lab tests.
 - Vision and hearing care.
 - Access to medical specialists and mental health care.
 - Treatment of special health needs and pre-existing conditions.

Q: If I'm eligible for the rest of my 12 months of postpartum coverage, how will I be notified?

A: You'll get a notice by mail or through Your Texas Benefits (if you've chosen to receive notices electronically).

All Medicaid and CHIP recipients should go to YourTexasBenefits.com or call 2-1-1 and choose Option 2, to make sure your mailing address and contact information are up to date.

Q: My pregnancy ended before the effective date of March 1, 2024, and I was previously receiving Medicaid or CHIP services. Will my coverage be extended?

A: Yes, if you are still within your 12-month postpartum period. Beginning on March 1, your coverage will be reinstated for the rest of your 12-month postpartum period.

Q: My pregnancy didn't go to term or there was a miscarriage/loss of pregnancy. Am I still eligible?

A: Yes, you're still eligible for coverage for 12 months after your pregnancy ended.

Q: If I get pregnant again during my 12-month coverage, what happens to my coverage?

A: If you report a new pregnancy while in your 12-month postpartum period, your eligibility will be reviewed for Medicaid or CHIP.

If you're eligible for Medicaid or CHIP for your new pregnancy, you'll receive coverage for the pregnancy and for 12 months after the new pregnancy ends.

Q: What happens if I report a new pregnancy in that 12-month postpartum period, but when my eligibility is reviewed, I'm no longer eligible and can't get certified for the new pregnancy?

A: You would remain enrolled in Medicaid or CHIP for your entire first 12- month postpartum period unless you:

- · Voluntarily withdraw. Move out of Texas.
- Are determined ineligible because of fraud, abuse or perjury.
- Die.

Q: Will I get a new Medicaid card for my 12-month postpartum coverage?

A: If you are currently receiving Medicaid or CHIP services you won't get a new Medicaid or CHIP ID card for the 12-month postpartum coverage period.

If you previously received Medicaid or CHIP services that are being reinstated or you're newly applying for coverage, you'll get a new Medicaid or CHIP ID card.

Q: Will I receive services through my managed care organization?

A: In most cases, you'll be enrolled in your prior managed care plan. If you have questions about enrollment in managed care, contact the Enrollment Broker at 1-800-964-2777.

Q: If I'm currently on CHIP and am eligible for 12-month postpartum coverage, will I need to pay another enrollment fee to get the extended coverage?

A: If you're currently receiving CHIP services and were found eligible by HHSC to receive 12-month postpartum coverage, you won't need to pay another enrollment fee to get 12-month postpartum coverage.

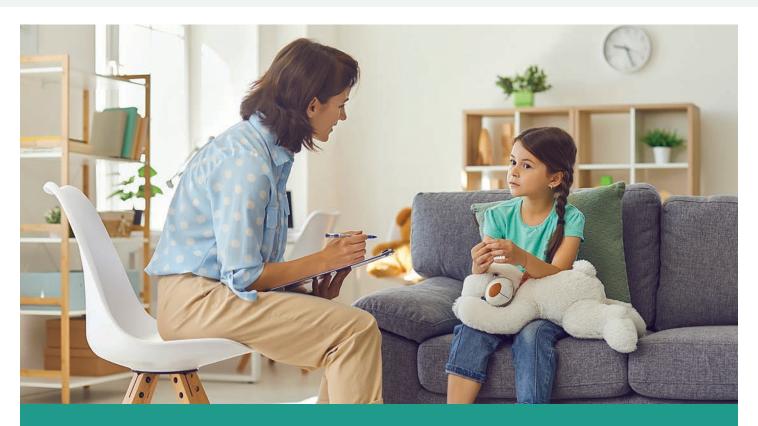

Q: Will my eligibility be automatically renewed when my 12-month postpartum period ends?

A: We'll attempt to automatically renew your Medicaid or CHIP coverage about two months before your 12-month postpartum period ends.

If you aren't eligible for full coverage Medicaid or CHIP, we'll determine if you're eligible for the HTW program. If we can't automatically verify your eligibility, we'll send you a renewal packet. Your renewal application must be returned within 30 days.

Q: I have more questions, who do I contact?

A: To learn more, visit the HHS Medicaid for Pregnant Women and CHIP Perinatal webpage, or call 2-1-1 and choose Option 2.

Child Psychiatry Access Network (CPAN)

The Child Psychiatry Access Network (CPAN) is a FREE, statewide initiative, funded by the Texas legislature, to address the mental health needs of Texas children and adolescents. The network of academic hubs for South and Southeast Regions (Region 2) includes Baylor College of Medicine, The University of Texas Health Science Center at Houston, and The University of Texas Medical Branch at Galveston

Mental health is an important part of our children and adolescent's overall health and well-being. More children and youth need mental health support now more than ever before. One in five children have a mental health disorder but cannot get timely access to psychiatric care due to a shortage of child psychiatrists and other behavior health professionals. This results in families often waiting for months before their child can see a psychiatrist.

CPAN is a free service for primary care physicians (PCPs) and pediatricians who provide care for children and youth under the age of 23. This is an evidence-based clinician-to-clinician program. This program is to enhance child and youth mental health care at the PCP's and pediatrician's practice.

CPAN offers these services:

 Consultations with a child psychiatrist to help with any mental health question including those about assessment, diagnosis, and implementation of

- treatments plans including psychopharmacology.
- 2. Guidance in developing behavior management plan.
- Facilitated referrals to reliable mental health providers in your community.
- Training opportunities for PCP's and pediatricians to improve the care of children and adolescents with behavioral health needs.

VISIT WEBSITE OR CALL TO ENROLL: https://tcmhcc.utsystem.edu/child-psychiatry-access-network-cpan/

Call 1 (888) 901-CPAN (2726), press 2 for South and Southeast Region and then "academic hub number" (see below) per your clinic's zip code.

- 1. Baylor College of Medicine
- 2. The University of Texas Health Science Center at Houston
- 3. The University of Texas Medical Branch at Galveston

If the academic hub is not known, then press "9" to get assistance in identifying your academic hub.

REFERENCE:

Texas Child Mental Health Care Consortium: https://tcmhcc.utsystem.edu/child-psychiatry-access-network-cpan/

Maternal mental health conditions are the most common complications of pregnancy and childbirth. In Texas, maternal mental health conditions affect more than 1 in 8 pregnant and postpartum women. Most of these women do not receive mental health care in a timely fashion.

Mental health conditions contribute to 21% of pregnancyrelated deaths in Texas and is the cause of 17% pregnancyrelated deaths. Substance use disorders contribute to 8% of pregnancy-related deaths.¹

Texas Perinatal Psychiatry Access Network (PeriPAN) is a FREE, state-funded initiative that offers access to a multidisciplinary network of mental health experts-including a reproductive psychiatrist-for peer-to-peer consults by phone. This program is for clinicians treating pregnant women and new mothers who may be experiencing mental health distress. PeriPAN's goal is to increase the clinician's capacity to treat maternal mental health conditions for people who are pregnant, postpartum, suffering perinatal loss, or planning pregnancy.

This network of psychiatrists assists clinicians by offering:

- Prompt real-time phone-based consultation on issues such as diagnostic clarification, treatment plans, and medication management.
- Facilitated assistance to vetted referrals and resources
- Free CMEs on perinatal psychiatry subjects/reproductive mental health

PeriPAN is available to clinicians who provide care to pregnant and postpartum people including but not limited to:

- OB/Gyns
- · Pediatricians

- · Family Practitioners
- · Other Primary Care Physicians
- Midwives
- Psychiatrists
- Psychologists

Facility Application Letter

Dear Provider:

Effective July 1, 2023, facilities enrolled in Texas Medicaid should submit the Texas Facility Credentialing Application directly to Verisys— **the Availity portal is no longer an option for submission**. The facility credentialing application can be obtained from the Community Health Choice's Provider website here or by contacting Verisys's customer service team at 1.855.743.6161. As always, Verisys will contact you to initiate the facility credentialing process. Community Health Choice will use this new Texas Facility Credentialing Application to credential facility Providers with all its products.

Please return your completed application with the supporting documents to Verisys via the following methods:

- · Upload to our secure document submission website at https://outreach.aperturecvo.com using access code "aperture."
- Email to TAHPapps@verisys.com utilizing the bar-coded letter as the top page of the PDF document.
- Fax to 866.293.0421 utilizing the bar-coded letter as a cover sheet.
- Mail to Verisys, P.O. Box 221049, Louisville, KY 40252-1049.

The removal of Availity as a portal for submitting facility credentialing applications is due to the rollout of HHSC's PEMS+1 and the expiration of Availity's contract with Verisys. PEMS+ is an enhancement that will move credentialing into the existing PEMS portal; when it rolls out, Providers and facilities will submit both credentialing and enrollment applications through PEMS+. We will communicate the timeframe for the rollout of PEMS+ as soon as it has been finalized by HHSC.

Please direct questions to Provider Services at 713.295.2295 or 1.888.760.2600.

¹ SB 200 (84R) requires a streamlined process for Medicaid provider enrollment and managed care credentialing. The PEMS+ rollout is led by HHSC and moves credentialing to the Provider Enrollment Management System (PEMS) portal, which is currently being used for provider enrollment.

Invalid NPI in NPPES to Trigger Disenrollment Action

Summary of Notification:

Texas Medicaid and Healthcare Partnership (TMHP) has identified several National Provider Identifiers (NPI) as inactive in the National Plan and Provider Enumeration System (NPPES) and will be taking immediate disenrollment action that will result in payment denial code (PDC) 64 added on to the Provider record in the Master Provider File (MPF).

Key Details:

- Providers must have an active NPI to remain active in any Texas state healthcare program. Providers should contact NPPES at 1-800-465-3203 to research and resolve any issues with the NPI status.
- TMHP will reverify the NPI status with NPPES when they release the next NPPES dissemination file, and the payment hold will be end-dated once the NPI is reinstated.
- Any claims and prior authorization requests that are submitted for dates of service on or after the disenrollment date will be denied.

Additional Information:

Providers can also refer to the current Texas Medicaid Provider Procedures Manual, General Information, Section 1, "Provider Enrollment and Responsibilities," for more information.

Resources:

Providers may find more information on Provider Enrollment at Provider Enrollment | TMHP.

Should you have any questions, please contact our Provider Services line at 713-295-2295 or email us at ProviderWebInquiries@CommunityHealthChoice.org.

Provider Demographic Information and Directory Accuracy

The Centers for Medicare & Medicaid Services (CMS) requires accurate data in Provider directories. Up-to-date Provider information allows Community to:

- · Accurately generate Provider directories
- · Process claims
- · Communicate with our network of Providers
- · Help patients locate your practice information

What can you do to help?

- Ensure your information in the NPPES is accurate (NPI number, taxonomy, etc.). Please visit the NPPES webpage for more information at https://nppes.cms.hhs.gov/#/.
- Update demographic information in the TMHP Provider Information Management System (PIMS). Please visit the TMHP Medicaid Providers homepage. For more information on using the PIMS, please reference the TMHP PIMS User Guide (PDF).
- Update your profile in Council for Affordable Quality Healthcare, Inc. (CAQH) at https://proview.caqh.org/.
- Notify Community in writing at least 30 days in advance (when possible) of changes, such as:
 - Change in practice ownership or federal tax ID number
 - Practice name change
 - A change in practice address, phone or fax number
 - Change in practice office hours
 - New office site location
 - Primary Care Providers only: If your practice is open or closed to new patients
 - When a Provider joins or leaves the practice

You can provide written request for updates to <u>ProviderRelationsInquiries@CommunityHealthChoice.org</u> or via fax to 713.295.7039.

Member Panel Reports

If you are a primary care physician (PCP), we urge you to review your panel report regularly. You can access a list of Members assigned to your panel via our Provider portal. You may also request a copy from your Provider engagement representative.

Review the reports to identify new patients and call them to schedule a new patient visit or to schedule established patients that may be in need of wellness visits or vaccinations.

In the event a Community Member sees you and is not on your panel, you may complete the "Member Request to Change Primary Care Provider" form while the Member is in your office and submit it to Community. Community will review and make the PCP change accordingly.

You will find the "Member Request to Change Primary Care Provider" form at: https://provider.communityhealthchoice.org/wp-content/uploads/sites/2/2020/12/Member-Request-to-Change-Primary-Care-Provider.pdf

If you do not see that you are the PCP assigned to the Member via the Provider portal, this should not keep you from seeing the Community Member. As long as you accept the plan that the Member is enrolled in, you can proceed with seeing our Member.

This allows Members the opportunity to see a Provider for non-emergent needs should their selected PCP not be available.

As a reminder, HHSC and/or its contractor perform random telephonic surveys to Providers without notice to ensure that new and existing Members have access to care. Community also conducts annual surveys to ensure that participating Providers are compliant with all access availability and after-hours access standards.

The appointment availability and accessibility standards are as follows:

Service	Appointment Availability
Emergent	Emergency services must be provided upon Member presentation at the service delivery site, including at non-network and out-of-area facilities
Urgent	Must be provided within 24 hours, including urgent specialty care and behavioral health services
Primary Routine Care	Must be provided within 14 days, including behavioral health
Specialty Routine Care	Must be provided within 21 days
Routine Care Dental	Within eight weeks for dental
Initial Outpatient Behavioral Health Visit	Must be provided within 14 days (this requirement does not apply to CHIP Perinatal)
Prenatal Care	Initial appointment must be provided within 14 days for non-high-risk pregnancies. For high-risk pregnancies or new Members in the third trimester, initial appointment must be provided within five days or immediately. Appointments for ongoing care must be available in accordance with the treatment plan as developed by the Provider.
Preventive Care Physical/ Wellness Exams	Newborns (less than 6 months of age): within 14 days; children (6 months to 20 years): within two months; adults (21 years and older): within 90 days; new Members: within 90 days of enrollment
	Medicaid Members should receive preventive care in accordance with the Texas Health Steps periodicity schedule. *CHIP Members should receive preventive care in accordance with AAP guidelines

Emergent/Emergency: A medical condition that manifests itself by acute symptoms of sufficient severity (including severe pain) such that a prudent layperson who possesses an average knowledge of health and medicine could reasonably expect that the absence of immediate medical care could result in one or all of the following:

- Health of the individual (or with respect to a pregnant woman, the health of the woman or her unborn child) is in serious jeopardy
- Serious impairment to bodily functions
- · Serious dysfunction of any bodily organ or part
- Inadequate time to safely transfer a Member who is pregnant and having contractions to another hospital before delivery, or if a hospital transfer might pose a threat to the health or safety of the woman or the unborn child
- Member is a threat to themselves or others; exhibits acute onset of psychosis or severe thought

Urgent Condition: A health condition, including an urgent behavioral health situation that is not an emergency but is severe or painful enough to cause a prudent layperson possessing the average knowledge of medicine to believe that his or her condition requires medical treatment or evaluation or treatment within 24 hours by the Member's Primary Care Provider or designee to prevent serious deterioration of the Member's condition or health.

Routine or Preventive (Non-Emergent): Postponement of treatment will not endanger life, limb or mental faculties of patient, i.e., patient's condition permits adequate time to schedule necessary history and physical, laboratory, radiology or other diagnostic studies on an outpatient basis.

Additionally, it is required that PCPs are accessible to Members 24 hours a day, 7 days a week. The following are acceptable and unacceptable telephone arrangements for contacting PCPs after their normal business hours.

Acceptable after-hours coverage

 The office telephone is answered after-hours by an answering service that meets language requirements of the major population groups and can contact the PCP or another designated medical practitioner. All calls answered by an answering service must be returned within 30 minutes.

- 2. The office telephone is answered after normal business hours by a recording in the language of each of the major population groups served directing the Member to call another number to reach the PCP or another Provider designated by the PCP. Someone must be available to answer the designated Provider's telephone. Another recording is not acceptable.
- 3. The office telephone is transferred after office hours to another location where someone will answer the telephone and be able to contact the PCP or another designated medical Provider who can return the call within 30 minutes.

Unacceptable after-hours coverage

- 1. The office telephone is only answered during office hours.
- 2. The office telephone is answered after-hours by a recording that tells Members to leave a message.
- 3. The office telephone is answered after-hours by a recording that directs Members to go to an emergency room for any services needed.
- 4. Returning after-hours calls outside of 30 minutes.

Prenatal Appointment Availability Requirements

Prenatal care must be provided within 14 days for initial appointment except for high-risk pregnancies or new Members in the third trimester, for whom an initial appointment must be offered within 5 days or immediately if an emergency exists. Appointments for ongoing care must be available in accordance with the treatment plan as developed by the Provider.

Time to Treatment (Calendar Days)
14 Days
5 Days
5 Days

Flu Vaccination Awareness for Children

Healthcare providers need to educate patients on getting the flu vaccination for the following reasons:

- 1. The primary goal is to protect patients from getting the flu, which can cause a range of symptoms from mild to severe, and in some cases, lead to hospitalization or death.
- 2. Even if a vaccinated individual contracts the flu, the vaccine can reduce the severity of the illness, leading to milder symptoms and a quicker recovery.
- 3. Healthcare providers play a crucial role in encouraging high-risk groups, such as the elderly, young children, and those with chronic conditions, to get vaccinated, as they are more susceptible to severe flu complications.
- 4. The Centers for Disease Control (CDC) recommends children to get their first dose at age 6 months and then continue to receive a flu vaccine at least once a year.

WE NEED YOUR SUPPORT TO COLLABORATE:

- 1. Community's new vaccine guidance page on the wellness corner for members https://www.communityhealthchoice.org/wellness-corner/vaccines/ that includes:
 - Member Scheduling Assistance and Transportation Request Form
 - · Printable parent friendly vaccine schedule in English and Spanish
 - A calendar of mobile immunization events and other helpful resources for parents
 - Education on vaccines that are recommended for different age groups.
- 2. Practical HEDIS tips for ensuring compliance with Childhood Immunization Status (CIS) during this flu season:
 - · Educate office staff to schedule flu vaccine appointments early in the season (it started October 1st in 2023).
 - Any vaccines after the age of 2 years old are considered late for HEDIS reporting so make sure members get the shot once a year and before they turn 2.
 - Review Community's 2023 HEDIS Quick Reference guide for tips on appropriate billing/coding Flu CPT: 90655, 90657, 90661, 90673, 90685-90689 CVX: 88, 140, 141, 150, 153, 155, 158, 161 HCPCS: G0008
 - Submit all immunizations records to ImmTrac. For more information please visit the Texas Department of State Health Services website: https://www.dshs.texas.gov/immunization-unit/immtrac2-texas-immunization-registry
- 3. Have the Member call Community's wellness coaching and health literacy support line at 1-844-882-7642 or 713-295-6789. Members can receive education on vaccines, the importance of routine preventive care, and more from our team of certified Community Health Workers.

Providers – Your Impact on Mental Health

Providers must be informed of the importance of reducing potentially preventable admissions in a behavioral health diagnosis. One way is to educate Members and provide behavioral health resources to reduce potentially preventable admissions.

Action Needed:

Providers can help address the following barriers in a behavorial health diagnosis:

- · The importance of maintaining scheduled follow-up appointments
- · Lack of knowledge of community-based resources
- · Low detection rates of mental illness in primary care
- · Behavioral health Providers have limited appointments available
- · PCP's lack of understanding of how to make a BH (Behavioral Health) referral
- · Lack of coordination between PCP (Primary Care Physician) and BH Providers

Strategy:

Providers must engage with Members with a behavioral health diagnosis, especially if Members don't require emergency department level care. Common concerns include anxiety, depression, and attention deficit disorders, as well as children on the autism spectrum. Community Health offers a PCP Toolkit that contains educational materials to assist PCPs in screening and identifying resources for Members with a behavioral health diagnosis. This information will be available on the new Provider portal. Partnership with Charlie Health can help identify Members with a depression diagnosis in efforts to reduce hospitalizations and readmissions.

What is the Care Management Depression Program? Eligible Members with a depressive disorder can be enrolled with a behavioral health case manager.

Welcome Home Packet

Community has developed a Member Discharge Toolkit containing a welcome home letter and an educational flyer about the importance of completing the initial/first follow-up visit after discharge.

Community's Aftercare Program

Community's Behavioral Health Case Management team contacts Members and schedules follow-up appointments with a Behavioral Health Provider. The team confirms appointments with the Provider and educates the Provider to call Members and reschedule the appointment within 24 hours.

Behavioral Health Provider Training

Community's Behavioral Health Team has developed Provider training materials designed to educate Providers on the importance of timely follow-up care after hospitalizations for Members with mental illness.

Reducing Behavioral Health PPAs

FACTS ON MENTAL ILLNESS:

Data from https://www.nami.org/mhstats

SIGNIFICANT IMPACTS OF MENTAL HEALTH

- · Detection of mental illness early
- · Medication adherence
- · Having other diseases or conditions in addition to mental illness
- · Resistant to treatment due to social or cultural stigma

WE NEED YOUR SUPPORT TO COLLABORATE

- Work with the patient to develop a treatment plan and assess their medication along with the side effects
- Assist patient with finding community resources for additional support, as well as offer 24/7 toll-free urgent support if the Member is experiencing thoughts of harming themselves or others
 - National Suicide Prevention Lifeline 800.273.TALK (8255)
 - Dial 211 or visit 211 online
 - National Alliance on Mental Illness text 741.741 or call 800.950.NAMI (6264)
- Utilize Community's Behavioral Health Complex Case Management Program
 - Patient may self-refer to any in-network Behavioral Health Provider
 No prior approval is required from Primary Care Providers
 - Patient may call Community at 713.295.6704
 - Providers may call Provider Services at 713.295.6704
 - Providers may fax referral information to our dedicated behavioral health team at 713.576.0932 (inpatient) or 713.576.0930 (outpatient)

ACCESS TO CARE

- Schedule the next follow-up appointment before the patient leaves the office and call to reschedule as necessary for non-attendance
- See the Community Provider Manual for BH care management coordination. Partnership with Charlie Health: During an analysis of 2022 admissions for BH diagnoses, depression represented 56% of all BH admissions.

WHY IS MEMBER FOLLOW-UP CARE IMPORTANT?

- · To emphasize the importance of maintaining scheduled follow-up appointments
- To learn about community-based resources
- To reduce low detection rates of mental illness in primary care
- · To understand the importance of making a BH referral
- To reduce the risk for potentially preventable readmissions
- Because BH Providers have limited appointments available
- To enhance patient-Provider coordination

1 in 5

U.S. adults experience mental illness each year

1 in 20

U.S. adults experience serious mental illness each year

1 in 6

U.S. youth ages 6-17 experience a mental disorder each year

of all lifetime mental illness begins by age 14 and **75%** by age 24

Suicide is the **2nd leading**cause of death among
people age 10-34

Well Child Care - Overweight and Obesity

Centers for Disease Control (CDC) and Prevention revealed that 19.7% of children between 2 and 19 years old are obese. At the local level, pediatricians are challenged to tackle childhood obesity along with other well child care such as vaccinations, mental health, and family life, which can affect childhood health. Providing a holistic care to children while attempting to combat obesity requires a team of professionals and the support of outside organizations.

Obese children suffer from psychological trauma from being bullied at school and isolated from social events. To overcome the social stigma and encourage the child to lose weight without affecting self-esteem, pediatricians and other healthcare providers must provide multidisciplinary management involving:

- Individualized dietary counseling for the child and family
- · Behavioral and psychological interventions
- Nutrition education for parents
- · Exercise activities for children and adolescents
- · Pharmacotherapy such as
 - Orlistat to prevents breakdown and absorption of fat
 - Phentermine for patients older than 16 years to control appetite
 - Metformin for type 2 diabetes

Post-Partum Care for High-Risk Mothers

Maternal care for high-risk postpartum patients is difficult and complex. High-risk postpartum patients often come from low-income households and minorities residing in rural communities that have limited access to specialists and medical services. Those limitations lead to multiple chronic medical conditions causing higher morbidity and mortality post-delivery.

Obstetricians and/or family physicians must be pro-active in preventing complications during and after pregnancies. To achieve optimal postpartum health, physicians must educate patients to schedule more frequent visits to the doctor leading to early detection of possible complications before and after delivery. Besides screening for health issues that can complicate the pregnancy and delay postpartum recovery, physicians should screen for social determinants that can also lead to stress and depression such as:

- Food insecurity
- · Lack of access to transportation
- Safe and clean housing
- · Financial insecurity
- · Violence and/or abuse
- Lack of education on how to properly care for the newborn baby

Physicians have the responsibility to refer patients to appropriate social services that can assist in providing the social and financial support for both mother and baby. Those referrals can lead to access to non-clinical and community-based services such as affordable daycare for the baby and

mother support groups. Referral to a home visiting nurse is also helpful to monitor the high-risk mother and baby's health conditions, provide hands-on education as needed, and ensure both mother and baby are committing to the required clinical appointments. The visiting nurse can also facilitate continued communication with the primary physician to report any mother and baby health conditions that may require intervention from other health specialists. In addition, creating postpartum care plans can also assist in a smooth transition from postpartum care to well-woman care.

Post-Partum Care Plan

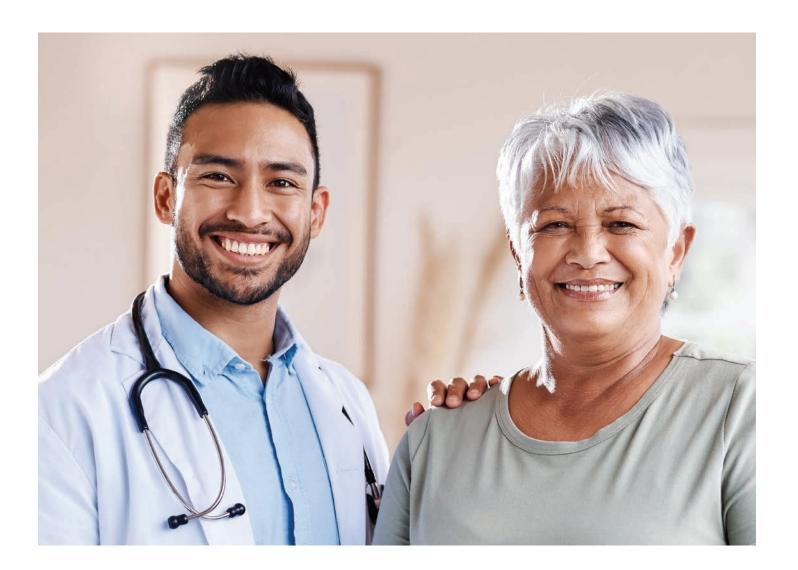

Components of a postpartum care plan (American College of Obstetricians and Gynecologist, May 2018):

Team Member	Role
Family and friends	• Ensures woman has assistance with infant care, breastfeeding support, care of older children
	• Assists with practical needs such as meals, household chores, and transportation
	Monitors for signs and symptoms of complications including mental health
Primary maternal care Provider (obstetrician- gynecologisct, certified nurse midwife, family	• Ensures patient's postpartum needs are assessed and met during the postpartum period and that the comprehensive postpartum visit is completed
physician, women's health nurse practitioner)	• "First call" for acute concerns during postpartum period
	 Also may provide ongoing routine well-woman care after comprehensive postpartum visit
Infant's heathcare Provider (pediatrician, family physician, pediatrician nurse practitioner)	Primary care Provider for infant after discharge from maternity care
Primary care Provider (also may be the obstetric care Provider)	May co-manage chronic conditions (hypertension, diabetes, depression) during postpartum period
	Assumes primary responsibility for ongoing health care after comprehensive postpartum visit
Lactation support (professional IBCLC, certified	Provides anticipatory guidance and support for breastfeeding
counselors and educators, peer support)	Co-manages complications with pediatric and maternal care Providers
Care coordinator or case manager	Coordinates health and social services among members of postpartum care team
Home visitor (Nurse Family Partnership, Health Start)	Provides home visit services to meet specific needs of mother-infant dyad after discharge from maternity care
Specialty consultant (maternal-fetal medicine, internal medicine subspecialist, behavioral healthcare Provider)	 Co-manages complex medical problems during postpartum period Provides pre-pregnancy counseling for future pregnancies

Elements	Components
Care team	Name, phone number, and office or clinic address of each member of care team
Postpartum visits	Time, date, and location of postpartum vlsit(s); phone number to call to schedule or reschedule appointments
Infant feeding plan	Intended method of infant feeding, resources for community support (eg, WIC, Lactation Warm Lines, Mothers' groups), return-to-work resources
Reproductive life plan and commensurate contraception	Desired number of children and timing of next pregnancy Method of contraception, instructions for when to initiate, effectiveness, potential adverse effects, and care team member to contact with questions
Pregnancy complications	Pregnancy complications and recommended follow-up or test results (eg, glucose screening for gestational diabetes, blood pressure check for gestational hypertension), as well as risk reduction recommendations for any future pregnancies
Adverse pregnancy outcomes associated with ASCVD	Adverse pregnancy outcomes associated with ASCVD will need baseline ASCVD risk assessmenat, as well as discussion of need for ongoing annual assessment and need for ASCVD prevention over lifetime
Mental health	Anticipatory guidance regarding signs and symptoms of perinatal depression or anxiety; management recommendations for women with anxiety; depression or other psychiatric issues identified during pregnancy or in the postpartum period
Postpartum problems	Recommendations for management of postpartum problems (eg, pelvic floor exercises for stress urinary incontinence, water-based lubricantf or dyspareunia)
Chronic health conditions	Treatment plan for ongoing physical and mental health conditions and the care team member responsible for follow-up

Quality Improvement Program Data Usage

As a participating Provider/practitioner in the Community Health Choice Network, you agree to cooperate in Quality improvement programs to improve the quality of care, services, and Member experiences. Cooperation includes the collection and evaluation of data and participation in the organization's QI programs. Community Health Choice may use Provider/practitioner performance data for quality improvement activities.

American Heart Month

Heart disease is a leading cause of death in the United States. Women and men may have different symptoms of a heart attack:

Female Silent Symptoms:

- Indigestion
- · Feeling of strained muscle in the chest or upper back
- Or prolonged excessive fatigue

Male Symptoms:

- · Chest Pain, pressure, fullness
- Discomfort in other areas of your body
- · Difficulty breathing and dizziness
- · Nausea and cold sweats

During the patient assessment, discuss common and silent symptoms that can cause a heart attack. Direct the patient to the Center for Disease Control and Prevention (CDC) that has various resources for individuals and patients that can assist in decreasing the risk of heart disease.

https://www.cdc.gov/heartdisease/american_heart_month_patients.htm

The CDC website provides information and handouts:

- Stroke
- High Blood Pressure
- Cholesterol
- Million Hearts
- Wisewoman Program
- · And other chronic disease topics related to heart disease

Diabetes Significantly Impacts Texas

The prevalence of diabetes in Texas and the nation has substantially increased over the past decade.

- Diabetes-related complications have a greater death risk than many types of cancer.
- Diagnosed diabetes costs an estimated \$25.6 billion in Texas each year.
- There are 7,142,000 people in Texas with 34% of the adult population having prediabetes.
- Approximately 2,758,942 people in Texas, or 12.3% of the adult population, have diagnosed diabetes.
- · Regularly assessing fasting blood sugar is essential.
 - o According to the CDC, a consistent fasting blood sugar level of 99 mg/dL or lower is normal, 100 to 125 mg/dL indicates a person may have prediabetes, and 126 mg/dL or higher indicates a person may have diabetes.
- A blood test, hemoglobin A1C (HbA1C), is also used as an indicator of diabetes. This test measures your average daily blood glucose levels over the prior 3 months.
 - o According to the CDC, a standard, non-diabetic HbA1C level is less than 5.7%. A HbA1c value of 5.7% to 6.4% is prediabetic, and diabetes can be diagnosed with a HbA1c of 6.5% or higher.

Late diagnosis causes several complications:

- Delays treatment
- Increases the risk for diabetes-related complications, such as diabetic ketoacidosis, blindness, heart attack, stroke, kidney failure, and amputation
- · Reduces both length and quality of life

Are you effectively reducing poor health outcomes for fellow Texans with diabetes, as much as you would like?

Consider connecting with the Texas Diabetes Council (TDC) to learn more about closing common care gaps for this population.

The TDC was established in 1983 with the goal of partnering with private and public healthcare organizations to promote diabetes prevention and awareness in Texas in addition to identifying and assisting with addressing issues impacting Texans with diabetes.

The TDC is also responsible for assessing the state's diabetes prevention and treatment programs. This information is then used to create and implement the Texas Diabetes State Plan, which is updated annually, odd-numbered years.

Diabetes has a significant impact on longevity, quality of life, productivity, and healthcare expenditures for affected Texans. The Texas Diabetes State Plan of 2023 includes the following priority areas:

- Improving eye health in all persons with diabetes.
- Improving mental health in all persons with diabetes
- Reducing identified health disparities for all persons with diabetes and/or obesity
- · Expanding the use of advanced diabetes technologies
- · Increasing access to insulin and diabetes treatments

How can a Provider connect with the TDC?

- Email: diabetes@dshs.texas.gov
- Phone: 512-776-2834
- Website: https://www.dshs.texas.gov/diabetes/texas-diabetes-council

Community encourages its providers to educate members on flu prevention and the importance of getting the annual flu vaccination, which is a covered benefit. Providers are encouraged to administer the flu vaccine during a THSteps medical checkup visit. When billing the THSteps visit, providers need to include:

- Age-appropriate diagnosis code for preventive care medical checkups on the claim
- Diagnosis code Z23 for immunization administration
- · Modifier 25 to identify a significant, separately identifiable evaluation and management service

Providers who are only administering the flu vaccine during an office visit can only submit diagnosis code Z23 on the claim.

Texas Vaccines for Children (TVFC) program covers Influenza vaccines for providers currently enrolled in the program. To learn more about how to enroll in the TVFC program, please visit https://www.dshs.texas.gov/immunize/tvfc/info-for-providers.aspx

Blood Lead level is one of the laboratory test that must be performed, at ages notated on the THSteps Periodicity Schedule, during the THSteps medical checkup visit. Initial testing may be performed using a venous or capillary specimen and must either be sent to the DSHS lab or performed in the provider's office by point-of-care testing. Point-of-care lead testing, when preformed in the provider's office may be reimbursed separately. All point-of-care blood lead level results must be reported to DSHS. Confirmatory tests must be performed using a venous specimen. Confirmatory specimens may be sent to the DSHS lab or the client or specimen may be sent to the lab of the provider's choice. All blood lead levels for clients who are 14 years of age or younger must be reported to DSHS.

For more information on lead screening procedures and follow-up, please refer to Appendix C of *Children's Services Handbook* in TMHP's Texas Medicaid Provider Procedures Manual (TMPPM) at this link.

THSTEPS Checkup Timeliness

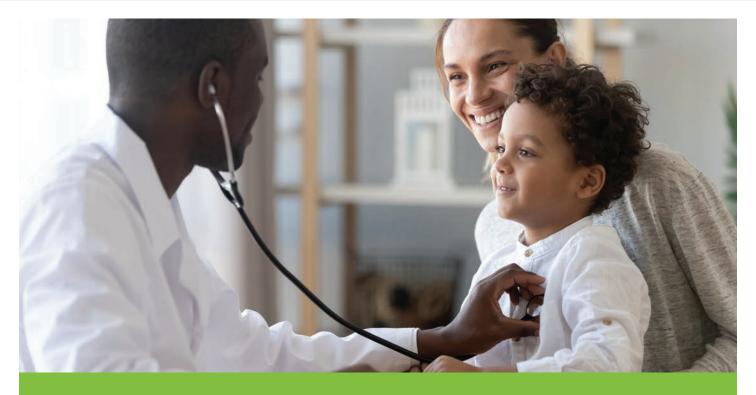

- New Community Members must complete a checkup within 90 days of enrollment with Community. Members participating in the Head Start program should receive their checkup within 45 days of enrollment with Community or enrollment in the Head Start program. This is a Head Start requirement.
- Existing Community Members must complete a checkup in accordance with the THSteps Medical Checkup Periodicity Schedule. Follow this schedule:

Complete before the next checkup age						
Newborn	2 months					
3-5 days	4 months					
2 weeks						
Complete <u>within 60 days</u> of these checkup ages						
6 months	18 months					
9 months	24 months					
12 months	30 months					
15 months						

Complete on or after the birthday but before the next birthday

Members ages 3 through 20 need a checkup once a year

The Membership panel is available on our online Provider portal titled "Panel Report (Medicaid/CHIP)" at https://providerportal.communitycares.com/Providers/Secure/Panel_Report.aspx

THSTEPS Checkup Documentation – Essential To Medical RECORDS

THSteps checkups are made up of six primary components, many including individual components. These are outlined on the Texas Health Steps Periodicity Schedule based on age and include:

- Comprehensive health and developmental history which includes nutrition screening, developmental and mental health screening and TB screening;
- Comprehensive unclothed physical examination which includes measurements; height or length, weight, fronto-occipital circumference, BMI, blood pressure, and vision and hearing screening;
- Appropriate immunizations, as established by the Advisory Committee on Immunization Practices, according to age and health history, including influenza, pneumococcal, and HPV;
- Appropriate laboratory tests which include newborn screening blood lead level assessment appropriate for age and risk factors, and anemia;
- Health education (including anticipatory guidance);
 and
- 6. Dental referral every 6 months until the parent or caregiver reports a dental home is established.

For you to be reimbursed for THSteps checkups, each of the six components and their individual elements must be completed and documented in the medical record. Any component or element not completed must be noted in the medical record, along with the reason it was not completed and the plan to complete the component or element.

To stay current on THSteps policy and available resources, visit the frequently updated THSteps website for information and policy updates. Information on checkup documentation is also available within THSteps Online Provider Education modules. These modules are free and offer continuing education for healthcare professionals. They are available at https://www.txhealthsteps.com/

Qualified and caring THSteps providers are vital to keeping young Texans healthy. The preventive health care you provide to young Texans is valued. It is important to reflect this care in the completeness of your medical documentation.

STAR Non-Emergency Medical Transportation Program (NEMT)

Community uses Access2Care to provide non-emergency medical transportation for STAR Members.

How Access2Care Pays for the Ride

- If your patient does not have a ride and no one can drive them, Access2care can arrange and pay for their ride on the bus or with a ride-sharing service.
- If your patient does not have a car but someone can drive them, then Access2care will pay back the driver by the mile to take the patient to the appointment and back.
- If your patient has a car but no gas money, Access2care might pay your patient ahead of time by the mile to get them to the appointment and back. For trips that require an overnight stay, Access2care might pay for overnight lodging and meals for the patient and their parent or guardian.

How Can You Help

- Remind Community's Medicaid patients about our nonemergency transportation provided by Access2Care if they miss an appointment or whenever you schedule an appointment. Patients can schedule or cancel a ride through the Access2Care Member app or call 24/7, tollfree at 1.844.572.8194.
- Please note: Children 14 years old and younger must be accompanied by a parent, guardian or other authorized adult at the medical or dental checkup.

For more information, please visit Community's Access2Care webpage for Members at https://www.communityhealthchoice.org/texas-star-medicaid-plan/member-resources/access2care-transportation/

Community's Transportation Service for CHIP Members

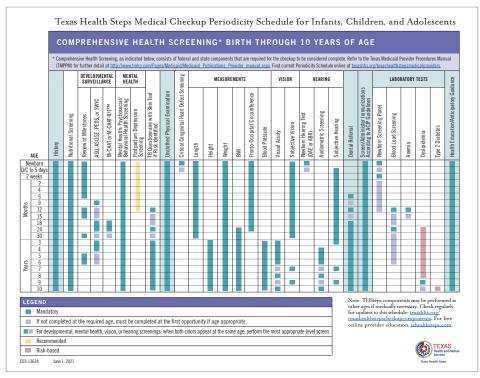

We offer free transportation for CHIP Members to doctors' appointments when no other transportation is available with prior approval by our case manager.

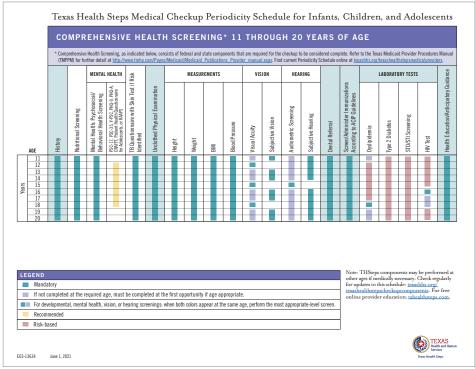

The Member or guardian must call Community Member Services at 1.888.760.2600 for approval at least three business days before the appointment. This value-added service is only available to CHIP Members where transportation services are available.

THSteps Medical Checkup Periodicity Schedule

The THSteps Medical Checkup Periodicity Schedule for Members ages 0-20.

The periodicity schedule can be downloaded via https://hhs.texas.gov/doing-business-hhs/provider-portals/health-services-providers/texas-health-steps/medical-providers.

Texas Health Steps Quick Reference Guide

TMHP updated the Texas Health Steps Quick Reference Guide (QRG) on February 1, 2024. Updates to the QRG include multiple vaccine procedure code changes. The updated QRG can be downloaded via

https://www.tmhp.com/sites/default/files/file-library/texas-health-steps/THSteps_QRG.pdf

Children of Traveling Farmworkers

A traveling farmworker's principal employment is agricultural on a seasonal basis. They move from place to place and live away from home for more than a few days at a time to work on a farm or in fields. These jobs include preparing crops, growing vegetables and fruits, planting trees, raising or caring for livestock or poultry or preparing dairy products.

A traveling farmworker is someone who:

- has been employed in this capacity within the last 24 months
- established a temporary abode for the purposes of such employment

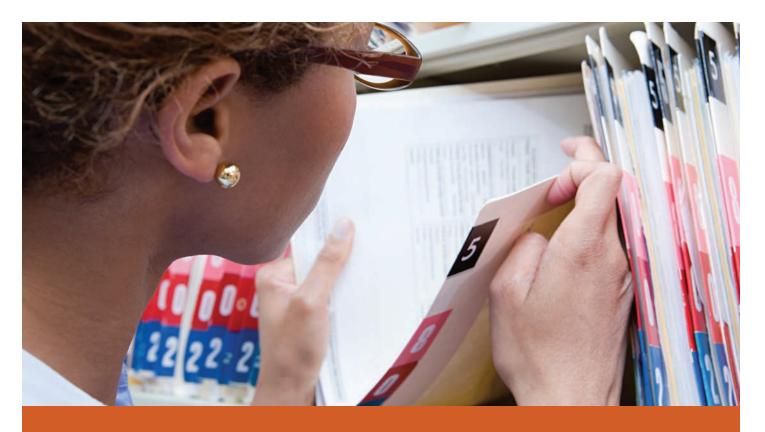

Their children, **birth through age 17**, are considered children of traveling farmworkers. Children of traveling farmworkers due for a THSteps medical checkup can receive their periodic checkup on an accelerated basis prior to leaving

the area. A checkup performed under this circumstance is an accelerated service, but it should be billed as a checkup. For example, a 4-year-old checkup may be performed prior to the child's 4th birthday if the child is a member of a traveling family that is leaving the area. Providers must use the CPT modifier "32" when providing accelerated services outside of the periodicity schedule.

Performing a make-up exam for a late THSteps medical checkup previously missed under the periodicity schedule is not considered an exception to periodicity or an accelerated service. It is considered a late checkup.

If you have any patients from Community who meet these criteria, please refer them to Customer Outreach Advocates at 713.295.2222. Our goal is to arrange for all healthcare services they may need before they leave for the new job.

Medical Record Request from the Special Investigation Unit (SIU)

Community Health Choice (Community) SIU is responsible for the identification and investigation of potential fraud, waste, and abuse and to ensure the fair and correct payment of claims submitted to Community. Community encourages Providers to implement necessary policies, processes, and procedures to ensure compliance with federal and state laws, regulations, and policies relating to the Medicaid, Marketplace, and Medicare Advantage Programs.

Texas Administrative Code, Title 1, Rule §353.502(g): Failure of the Provider to supply the records requested by the MCO will result in the Provider being reported to the HHSC-OIG as refusing to supply records upon request and the Provider may be subject to sanction or immediate payment hold.

Social Security Act, Title XVIII, Section 1833€ states "(e) No payment shall be made to any provider of services or other person under this part unless there has been furnished such information as may be necessary in order to determine the amounts due such provider or other person under this part for the period with respect to which the amounts are being paid or for any prior period."

Code of Federal Regulations, Title 42, Section 424.5(a)(6) Sufficient information: The provider, supplier or beneficiary, as appropriate, must furnish to the intermediary or carrier sufficient information to determine whether payment is due and the amount of payment.

It is important that Providers cooperate by submitting all requested documentation in a timely manner. **Failure to supply the records** will be viewed as non-compliance and may result in negative action that could include: **recovery of payments for the claims under review**, referral for legal or regulatory action, payment withhold, breach of contract action or other action as allowed.

Annual Texas Health Steps Provider Training

Community requires all contracted THSteps Providers take annual Texas Health Steps Provider training. Log in to your Provider portal at https://provider.communityhealthchoice.org to complete this annual mandatory training by December 31 of each calendar year. If you have any questions, please contact your Provider engagement representative.

Breastfeeding

Stay up to date on current breastfeeding information and guidance and learn how you can provide support to help families meet their breastfeeding goals. This course is available at https://www.txhealthsteps.com/641-breastfeeding?utm_source=courseannouncement&utm_medium=email&utm_campaign=POST+BF-other.

New Hearing and Vision Screening Training Available

Hearing and vision screenings are required components of Texas Health Steps preventive medical checkups. This course provides helpful information about conducting age-appropriate screenings, as well as guidelines for coordinating with school-based screenings and making referrals when necessary. This course is available at https://www.txhealthsteps.com/654-hearing-and-vision-screening.

New Cultural Competency Training Available

Practitioners have the opportunity to earn CEUs for Cultural Competency Training. The training is offered by the U.S. Department of Health and Human Services, Office of Minority Health, and is featured on the Community Health Choice website and within the Provider portal. There are specific trainings for physicians, nurses, and maternal healthcare Providers. Please refer to the resources tab for Cultural Competency or log in to the Provider portal for more details.

https://provider.communityhealthchoice.org/

Online Provider Education – Free Continuing Education (CE) Hours

Texas Health Steps' online program offers more than 60 CE-accredited courses that cover a broad array of health topics. These topics range from wellness and prevention essentials, like breastfeeding and immunization, to specialized courses about treating children with asthma, diabetes, high blood pressure, and many other chronic health conditions. **First-time users will need to register**. These courses are available at http://www.txhealthsteps.com/cms/.

Postpartum Health: Screening and Intervention

Learn how to identify and address factors that affect maternal health and safety in the first year after childbirth. This course is available at https://www.txhealthsteps.com/634-postpartum-health-screening-and-intervention?utm_source=courseannouncement&utm_medium=email&utm_campaign=POST+BF-other.

Training on Childhood Anxiety Disorders

Texas Health and Human Services offers a free continuing education course on childhood anxiety disorders.

An estimated one-third of adolescents experience an anxiety disorder, but the majority do not receive treatment. This course provides guidance about identifying and managing childhood anxiety, including making referrals and providing ongoing care in a primary care setting.

https://www.txhealthsteps.com/618-childhood-anxiety-disorders?utm_source=courseannouncement&utm_medium=email&utm_campaign=CANX-other

TMHP Online Provider Education

TMHP offers a variety of training for Providers online using computer-based training (CBT) modules on the TMHP Learning Management System (LMS). Medicaid Providers can access this training from any location with internet access anytime at their convenience. TMHP CBT modules offer a flexible training experience by allowing Providers to play, pause, rewind, and even search for specific words or phrases within a CBT module.

First-time users will need to register.

CBT topics include:

- Children with Special Health Needs Service Program Basics
- Claim Forms
- · Claims Appeals
- Client Eligibility

- Crossover Claims
- Family Planning
- Texas Health Steps Medical Services
- Provider Enrollment on the Portal
- And much more

To access the training, please visit: http://learn.tmhp.com/.

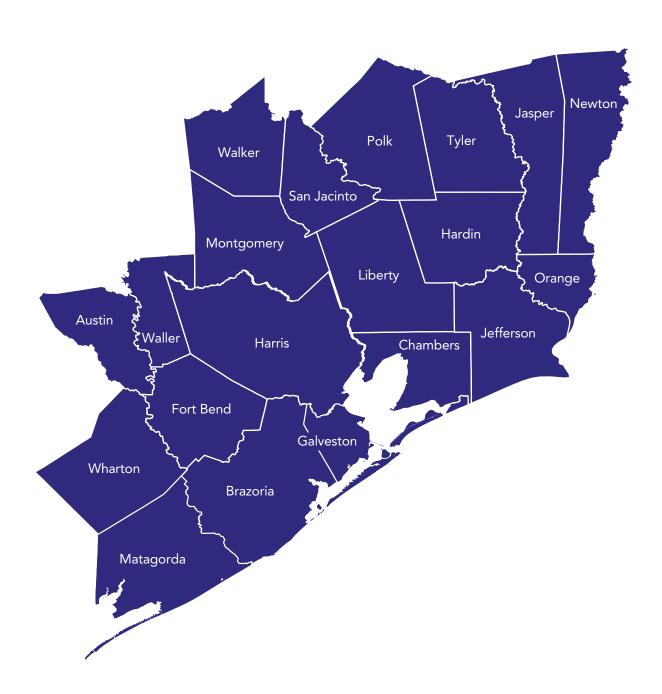

Vendor Drug Program Continuing Education (CE) for Prescribing Providers

As a Medicaid-prescribing Provider, you can help Medicaid clients get their medications quickly and conveniently with a few simple steps. By prescribing a preferred product or obtaining a prior authorization before the client leaves the office, the prescription can be filled without delay. This eliminates the need for the pharmacy to contact the prescribing Provider's office for a therapeutic substitution, as well as the need to initiate the prior authorization process.

For a list of Medicaid Drug Formularies and free CE credits, please visit

https://www.txvendordrug.com/providers/prescriber-education-and-training.
