

## UPDATE AND REVISION TO NATIONAL DRUG CODES (NDCS) ADDED TO MEDICAID, CHIP FORMULARIES

7/18/2024

### BACKGROUND

Vendor Drug Program (VDP) added new NDCs to the Medicaid and CHIP formularies that require additional and revised information for MCO manual addition to formulary.

### KEY DETAILS

Gainwell and VDP are currently working to correct defects in the various formulary files, so MCOs must add these NDCs to their system manually and make the necessary system changes for drug coverage. We added market basket and drug exclusion code information so you can add the NDCs in a complete manner.

Additionally, the following revisions from previous MCO notices should be noted:

- NDC 66993079297, the drug was changed to FLUTICASONE PROP 250 MCG DIS and the PDL status was changed to NPD (non-preferred)
- NDC 70069081490, ESOMEPRAZOLE MAG DR 20 MG C was added to FFS Medicaid with effective date of June 12, 2024
