VDP TO ADD CONTINUOUS GLUCOSE MONITORS (CGM) TO FORMULARY IN JUNE 2026

BACKGROUND

VDP will add continuous glucose monitors currently covered by Texas Medicaid through the medical benefit to the VDP formulary for processing through the pharmacy benefit, effective June 3, 2026. VDP must work with our pharmacy systems vendor to implement system changes to support these new products, including a federal requirement to only pay pharmacy claims for CGMs when the pharmacy is also enrolled with Texas Medicaid as a durable medical equipment (DME) provider.

Key Details:

The Continuous Glucose Monitors (CGM) will be covered June 3. VDP will provide a draft file of covered products closer to the start date. The pharmacy must be DME-enrolled with Texas Medicaid in order for the CGM pharmacy claim to be considered for payment. CGMs will continue to be payable under the Texas Medicaid medical benefit.
